

Blessed Trinity Catholic School

Trinity Enrichment Math

2025 Summer Work

Practicing grade level math work is essential to enforcing student understanding and improving student efficiency with math concepts.

Consistently engaging in math practice throughout the summer keeps the brain thinking and helps to minimize learning loss. This also ensures that the students are prepared when math lessons start up again and the work provides the teacher with important data used to guide instruction.

Summer math assignment:

60 minutes of IXL recommended math skills practice per week

- Students are to use their IXL login information from the 2024–2025 school year. Please e-mail Mrs. Kenna if you no longer remember it.
- Students may work in the Diagnostic arena before 3PM until their current levels are assessed.
- Students should then focus on the skills that have been recommended either by Mrs. Kenna or from the Diagnostic on www.ixl.com
- The 60 minutes may be split up however the student wants throughout the week, so long as the total amount of time spent on math practice adds up to 60 minutes by the end of the week.

Please direct any questions regarding this assignment to Mrs. Kenna at kenna.s@blessed-trinity.org.

Have a blessed summer!

“Succeeding together through Catholic formation, academics, athletics, and a community that brings all to Christ.”
